Final Assignment

1. In three pages or less, summarize what you have found about your molecules.

2. Make initial recommendations for:
   – Which in vitro/HTS assays would be most useful for their compounds.
   – Changes to individual molecules that may make them safer
   – For how the biobased molecules compare to the petroleum based molecules.

3. Prepare a short ~5 min presentation: ppt slides or ppt OK. Which we will start class with on Monday.
