Green Chemistry
COLLABORATIVE APPROACHES AND NEW SOLUTIONS

Thursday, March 24, 2011
University of California, Berkeley

Registration 8:30 am
Conference 9:00 am to 5:00 pm
Sutardja Dai Hall Auditorium
UC Berkeley Campus

Registration Costs:* Corporate $125
Academic and Non-profit $35
Students $15
*lunch and reception included

INFORMATION AND REGISTRATION

ABOUT BCGC
BCGC is the nation’s first major academic effort to address the challenges of green chemistry through the lenses of chemistry, the environmental health sciences, natural resource studies, public policy, law, business, and economics. The Center is an interdisciplinary collaboration of the colleges and departments representing these disciplines on the Berkeley campus (see http://bcgc.berkeley.edu).

ABOUT THE CONFERENCE
Green Chemistry: Collaborative Approaches and New Solutions is the Berkeley Center for Green Chemistry’s first national conference. It will introduce the collaborative, interdisciplinary approaches piloted by BCGC and will feature leaders in these fields, who will speak to the role of green chemistry in responding to society’s most pressing health, environmental and economic problems.

Confirmed Speakers
- Prof. Robert Grubbs, Chemistry, California Institute of Technology, Nobel Laureate
- Dr. John Warner, President, Warner Babcock Institute for Green Chemistry
- John Balbus, M.D., M.P.H., Senior Advisor for Public Health, NIEHS
- Dr. Henry Brynzda, Director - Technology, DuPont
- Gerald Poje, PhD., founding Board Member, U.S. Chemical Safety and Hazard Investigation
- Dr. Bob Peoples, Director, American Chemical Society Green Chemistry Institute

Invited Speakers
- Administrator Lisa Jackson, Environmental Protection Agency
- Hon. Joe Simitian, 11th District State Senator, California Senate
- Representative Henry A. Waxman, 30th District of California
- Hon. Mike Feuer, Majority Policy Leader, California Assembly
